INSTALLATION FOR MULTIPLE RECESSED LED DOWNLIGHT

1. Measure distance from walls and mark position of housing to be installed between joists.
2. Extend the hanger bars and level to lower edge of joists. Hammer pre-installed nails into all the joists (both sides)(FIG.1).
3. Carefully open a hole in accordance to the cut-hole dimensions with keyhole saw (refer to the provided cut hole size)(FIG.2).
4. Provide electrical service according to your local electrical code for a suitable junction box. Supply wire insulation must be rated for at least 90° C.
5. Remove the junction box cover. Remove the appropriate knock-out(s) to accommodate the type of electrical service to be used.
6. Insert electrical supply cable through knock-out in the junction box. Wire junction box using supplied quick connect push-in terminals. Connect green ground wire of cable to green wire on junction box. Connect white wire of cable to white wire of junction box. Connect black wire of cable to black wire of junction box. Make certain there are no exposed strands of wire and place all wiring and connections back in junction box and replace the cover. (FIG.3).
7. If using 0-10V dimmer, please connect the 0-10V dimmer with the driver. Connecting the purple wire to purple wire Connecting the grey (pink) wire to grey (pink) wire
8. Firmly secure the junction box to the mounting plate(FIG.4).
9. Connect the fixture to the junction box by inserting and twisting the DC male/female connectors(FIG.5).
10. Push the pressure tabs upward towards the LED fixture. Push the fixture through the hole until the trim is flush with the ceiling. Pressure tabs will retract to hole in place(FIG.6).
11. Once assembly is complete, turn on power to confirm the fixture is working properly.

Triac DIMMING (120V only): We recommended LED/CFL dimmers that have a low range adjustment dial. After all fixtures are connected to the dimmer, adjust the dial to the lowest position before the lights start to flicker or shut down. This setting depends on the local voltage and number of fixtures per dimmer. For a typical LED dimmer rated for 150W LED load the maximum number of fixtures per dimmer.

0-10V DIMMING (120-277V AC): The dimming control wires are Grey/Pink wire (dim-) and Purple wire (dim+). Please connect the 0-10V dimmer and the driver purple wire to purple wire and Grey/Pink wire to Grey/Pink wire with the supplied block.

WARNING: DO NOT USE ANY OTHER DRIVERS EXCEPT THE DRIVERS THAT ARE INCLUDED WITH THE FIXTURE. DO NOT CONNECT MULTIPLE FIXTURES TO ONE DRIVER. DO NOT OPEN THE LIGHT FIXTURE OR THE SIDE PLATES OF THE DRIVER - NO SERVICEABLE PARTS INSIDE.
