

Multi Driver converter

ⓘ IMPORTANT: Read all Instruction before installing, Retain it for future reference.

⚠ WARNING: Make sure the power is OFF from the electrical panel before starting or installation attempting any maintenance.

Model	G-95823			G-95824				G-95825			G-95826		
Input Voltage	DC 24V												
Output Voltage	DC 36V												
CCT	2700K-3000K-3500K-4000K-5000K												
Selectable Wattage	5W	7W	8W	9W	10W	12W	14W	16W	18W	20W	22W	24W	
Output Current	115mA	175mA	195mA	210mA	230mA	270mA	340mA	370mA	420mA	500mA	520mA	540mA	
Operating Temperature	-40°C to 40°C												
Suitable Location	Damp Location												

Installation Guidance:

- 1.Choosing the suitable driver according to the lighting fixture’s input current. Make sure the driver’s output current match the input current of the lighting fixture.
 - 2.Connecting the lighting fixture and driver, then select the correct power switch position.
 - 3.Connecting the driver’s Red wire to DC24V driver’s output “+”,
Connecting the driver’s Black wire to DC24V driver’s output “-”.
- All wires are connected well, turn on the power to check if all lights works well.
